

PHUC TRAN

Frontend Developer

Ho Chi Minh City, Vietnam | +84 934 669 631 | tranhoangphucttb@gmail.com | tranhoangphucttb.dev | github.com/hphuc112 | linkedin.com/in/tranhoangphucttb

SUMMARY

Computer Science graduate specializing in frontend development with React, Next.js, and TypeScript. Built and shipped a personal portfolio plus two independent live projects, covering full-stack data work, scroll-driven animation, and production deployment. Looking for a junior/entry-level developer role to contribute from early on while continuing to learn from experienced engineers.

PROJECTS

Portfolio Site tranhoangphucttb.dev

Next.js · TypeScript · Tailwind CSS v4 · Motion · Lenis

- Designed and built end-to-end: custom design tokens, staggered entrance animations, responsive layouts, and an accessible animated FAQ accordion.
- Deployed on Vercel with a custom domain, Open Graph/Twitter metadata for link previews, and Lighthouse-informed performance tuning.

Habit Tracker [Live demo](#) · [GitHub](#)

Next.js · TypeScript · Supabase · Recharts

- Full-stack habit tracker with flexible scheduling and streak analytics beyond simple daily checkboxes.
- Surfaces correlations between habits and visualizes progress with a GitHub-style contribution heatmap.

Scroll Journey [Live demo](#) · [GitHub](#)

Next.js · TypeScript · Tailwind CSS v4 · GSAP (ScrollTrigger, SplitText) · Lenis

- Experimental single-page piece with no narrative or traditional UI - an evolving visual journey driven entirely by scroll position.
- Used GSAP ScrollTrigger to pin each section and tie its timeline directly to scroll progress, synced with a custom Lenis smooth-scroll layer so motion and scroll feel like one continuous system.

SKILLS

- Core: Next.js, React, TypeScript
- Styling & Motion: Tailwind CSS, Framer Motion, GSAP
- Tools: Git, Vercel, Figma

EDUCATION

Bachelor - Computer Science

International University – VNU HCMC 2018 – 2025

CERTIFICATIONS

- TOEIC — Listening & Reading: 660/990, Speaking & Writing: 310/400
